Cleaners Extend Reach into Accessories Market

Cleaning Products Manufacturer Adds a Polishing Ball to Extensive Line of Products

Kalamazoo, MI – A cleaning products manufacturer is polishing their way into the accessories market with the introduction of a new product. Bio-Kleen Products, Inc., makers of specialty cleaners for boats and RVs, snowmobiles, motorcycles and more, has now introduced the Bio-Kleen Polishing Ball – a durable fiber ball that connects to any common drill to assist in polishing metals and other surfaces. The company has introduced the polishing ball to complement their various metal polishes in the snowmobile, motorcycle and marine cleaner lines.

Bio-Kleen boasts that using the Bio-Kleen Polishing Ball with one of their polishes, such as the SledBrite Metal Polish, is the fastest and most effective way to polish metals. The four inch polishing ball is made with soft, durable fibers; which makes it effective on a wide range of surfaces and ensures it's build to last. The biggest advantage to using the Bio-Kleen Polishing Ball is that it fits into tight, hard to reach areas; making any difficult polishing job quick and easy. Of course the polishing ball takes a lot of the elbow grease out of polishing as well. The speed and consistent repetition you can get from the spinning of a drill really helps the metal polish work better. Not to mention saves you time and energy.

Another advantage with this polishing ball is that it can be washed and reused, though it may not need to for a while. If the polishing ball is only used to apply one product on the same surface type, like using the fore mentioned SledBrite Metal Polish to polish up your snowmobile tunnels, it can be used again and again unless build up becomes too great. Then cleaning it is as easy as letting it soak submerged in a solution overnight, Bio-Kleen recommends a 1:8 solution of SledBrite Belly Pan cleaner degreaser to hot water (four cups hot water to four ounces cleaner), giving it some agitation if needed, then rinsing thoroughly and letting dry completely before your next use.

So what can you use the Bio-Kleen Polishing Ball for? Polishing any uncoated, polishable metal finish; such as: snowmobile tunnels, billet, diamond plate, running boards, motorcycle pipes, tanks, handlebars, marine exhaust pipes, aluminum, stainless steel,

brass, copper, bronze, nickel and more. The [Bio-Kleen Polishing Ball](#) can also be used for special applications on painted surfaces, fiberglass, clearcoat, plastics, rims, glass, snowmobiles, motorcycles, automobiles, boats, RVs and in the garage.

[Bio-Kleen](#) may have found a perfect match with the introduction of the [polishing ball](#). This is an accessory that can be used with several of their existing products ranging from the snowmobile to motorcycle to marine markets. They have also created a product that makes their already easy to use cleaning products even easier. Sure there are other polishing balls currently on the market, but this is a quality item that can stand up to the competition and retails for only \$15.95; that's only a fraction of what some other polishing balls go for. If you've used other polishing balls and have had issues with tearing or deterioration or just no success at all, give the [Bio-Kleen Polishing Ball](#) a try, you may never look back.

[Bio-Kleen Products, Inc.](#) has been an American made business for over twenty two years. The company's number one goal is to provide effective cleaners that are safe for the user and safe for the environment. [Bio-Kleen](#) manufactures biodegradable, non-toxic cleaning solutions produced with the most premium, natural, renewable and non-petroleum based ingredients for each application. All products are non-aerosol and ozone safe and never tested on animals. [Bio-Kleen's](#) packaging can also be reused and is 100% recyclable and encourages its customers to participate. A number of [Bio-Kleen's](#) cleaning products have been tested and approved by the USDA BioPreferred Program, which aims to increase the purchase and use of renewable, environmentally friendly biobased products. [Bio-Kleen Products, Inc.](#) has also been recognized by the Kalamazoo Regional Chambers Green Choice Program; which is only awarded to companies that have shown leadership in sustainable and environmentally friendly (green) business practices, services and products.
